KENNETH MACKAY.

REPORT OF THE LIBRARY COMMITTEE,

NOVEMBER 1st, 1902, to OCTOBER 28th, 1903.

To the Medical Faculty of McGill University :

GENTLEMEN :—

As was anticipated in last year's report, the amount of free shelving became very limited in the course of the year, so much so that there is now practically no room left. We have therefore again to bring before the Faculty the need of additional stacks being placed in the stack room.

Among the more important additions to the Library during the year are the following :

From the Post Graduate Fund, sixteen volumes of the *Munchener Medicinische Wochenschrift*, 1886-1891. Eleven volumes of the *Jahrbuch für Kinderheilkunde*, completing the set given by Professor Blackader, and ten volumes of the *Comptes Rendus de la Société de Biologie*.

From the President of the Royal Academy of Medicine of Ireland, Dr. Atthill, a set of the *Transactions*.

In addition to these the Johns Hopkins Hospital Reports, the *International Journal of Medicine*, *Transactions of the Academy of Surgery of Philadelphia*, *The Journal of Science*, *Transactions of the Roentgen Ray Society*, and numerous missing volumes to sets already on the shelves have been secured.

Among other important donations may be mentioned :

Books donated by Dr. Blackader, Dr. Cameron, Dr. Birkett ; Editors of the *Buffalo Medical Journal* ; Quine

Medical Library, Chicago; Johns Hopkins University, Boston Medical Library, Paris University, Berlin University, Association of Medical Librarians, Indian Government, McGill Post Graduate, Teaching Staff, Dr. McPhail, Dr. Shepherd, Amsterdam University, Dr. Finley, Heidelberg University, Dr. Senn.

Some of the new sets added have been, the Cape of Good Hope Departement of Agriculture, Transaction; Academy of Surgery of Philadelphia, Transaction; American Roentgen Ray Society, Science; American Veterinary Association, Transaction; Bureau of Animal Industry, Transaction; Manchester Microscopical Society.

The Travelling Library:—Books and Journals have been sent to the following places: University of Toronto, Toronto city, Brantford, Amherst, Vankleek Hill, Hamilton, Halifax and Caledonia Springs.

We have as usual sent through the Smithsonian Institution, journals and monographs to the English, French, German and American Universities. Boxes have also been sent to the Quine Library, Chicago; Boston Medical Library; Rhode Island Medical Society; whilst the Association of Medical Librarians have received the pamphlets of the Teaching Staff of the Medical Faculty and the Royal Victoria Hospital Studies

The work of accessioning the books in the Library is proceeding satisfactorily. The old books which have been accessioned are those on Anatomy, Physiology, Hygiene, Public Health, Materia Medica, Therapeutics, and all new books are accessioned when received.

The library has been represented officially by the Assistant Librarian, at the sixth annual meeting of the

Association of Medical Librarians, held in New York and Brooklyn, in June.

The Surgeon-General's Library at Washington has kindly continued to loan books upon application.

Some of the graduates and teachers in the Medical Faculty have offered to add certain current French, German and Italian Journals to the Library as owing to lack of funds it is impossible to enlarge the present list.

Professor Shepherd presented a picture of The First Meeting of the Medical Council of London. Professor Rutan, The portrait of Dr. Stevenson. Dr. Tait McKenzie, a picture of his famous Sprinter and the Athlete.

The Undergraduates Medical Society: The portraits of Dr. Howard, Dr. Ross and Dr. Macdonnell.

The Faculty is grateful to Dr. Osler for his gift of a copy of the first edition of Vesalius, and for a copy of Harvey's "*De Generatione Animalium*".

STATISTICS.

1902-3

Nov. 1st. 1902 to October 28, 1903.

Number of Readers	13015
